

ABOUT US

“GOLDRUNNER” is the pen name of a Dentist from Illinois who has developed ground breaking work in the area of Market Fractal Analysis. GOLDRUNNER’s original fractal work began with the Gold Charts in 2002, and has led to mechanical models that are amenable to forward-looking targets in both price and in time for Gold and other markets. His work includes the companion use of adapted proprietary Charting and Technical Analysis techniques to help “discover future market potentials in price and in time” and is aided by comparisons to other Markets and Asset Classes as reference points to bolster confidence in forward-looking price projections. Though GOLDRUNNER’s primary focus is on the Precious Metals at this time, his current work extends to most other Markets including Silver, the DJIA, the US Dollar Index, the Precious Metal Stock Indices, the chart of Copper, and the list continues to grow.

GOLDRUNNER’s site is supported by a group of individuals who have vast experience and complementary skills including a former VP for a Fortune 50 Company, an individual who actively traded in the Gold Pits for over 2 decades who also has vast experience trading currencies and most other asset classes, a forward-thinking stock broker / investment advisor in the Chicago area, an individual with decades of success in the oil and gas fields, an individual with decades under his belt in the investment arm of a major world-wide Bank, and other individuals who have been very successful in different businesses including investing, brokerage, and lecturing on the Precious Metals during the 1970’s Gold Bull Market.
